

**Eagles Education  
and Training**

Eagles Education and Training is a Registered Training Organisation (RTO number 45406) which offers a range of education and training options for young people who are struggling with the mainstream school setting. We focus not only on the fundamentals of education but on what it takes to become employable. We develop individual plans depending on the students needs and inspire, motivate and guide them on their journey.

After the 1 week program successful students will:

#### **Return to School**

We believe that young people, **where possible** should stay in mainstream school.

During the 1 week RESET we will work closely with the student to understand their barriers and what's holding them back from a successful school engagement.

Where possible, we look forward to working with our local schools to support students returning to their 'home' school

#### **Commence Training**

We also know that **school is not for everyone**. Where we find that a young person truly does need an alternative setting and alternative pathways, we take the time to help them build their own individualised pathway.

We are able to facilitate learning in many vocational areas including Community Services, IT, Business Admin, Retail, Early Childhood and others.

Where we cant deliver the courses ourselves we will connect the student to someone who can!!

#### **Transition to work**

We have an ever evolving network of industry partners who are keen to **give a kid a go**.

Once ready to venture out in to the workforce, we use the network to find the right fit and support students in the transition.

Once again, where we don't have the magic button or the perfect fit, we will find a service who can help.

**1 Week RESET programs are held 2-3 times per term.**

**Get in touch to book in for the next round of intake:**
